

- Peace of Mind -

Light when you need it, guaranteed!

"Recently, we had a blackout in our neighborhood, and all of our flashlights that used batteries were dead or low in power. Even with the good batteries, we were reluctant to use them for prolonged use, since the batteries would be drained. Now with the NightStar flashlight, I completely feel comfortable to have it turned on forever for any future blackout or any dire occasion."

Larry Liao - Flushing, NY

Don't be disappointed by imitations -
NightStar flashlights will never let you down

The Brightest Ideas Outlast All Others!

"The night in the desert was very dark - there was no moon - and we had a problem with scorpions, so as leader of the trek I spent a lot of time checking for them. The torch never let me down and I was not worried about using it excessively, due to its unique re-charging abilities. In short, I would recommend anyone to purchase one of these unique torches; it will certainly accompany me on any further expeditions."

Richard Barber - United Kingdom
